However, ODL is costly for Ripple

Ripple is incurring \$2 of liquidity cost for every \$1 of Incentives we pay MGI

Note: These costs are current run rate.

1. Assumes XRP 20c.

2. Liquidity cost estimated to go down b [REDACTED] starting Q3 based on MM renegotiation.

Where do we go from here?

- 1 Use MGL ODL flows to help achieve **XRP Origination** revenue targets for 2020 [REDACTED]
- 2 Redirect deal economics to further incentivize **more strategic activities**
- 3 Find ways to make **ODL more cost-efficient**

Where do we go from here?

- 1 Use MGI ODL flows to help achieve XRP Origination targets for 2020
 - o Target [REDACTED] of volume for rest of year (down from [REDACTED] BAU)
 - o [REDACTED] shortfall in incentive value for MoneyGram vs. 2020 minimum target
 - o [REDACTED] in savings to Ripple vs. BAU
- 2 Redirect deal economics to further incentivize more strategic activities
 - o **Caas** - add Incentives to more quickly scale this relationship
 - o **Build out RippleNet** - incentivize MGI ODL go-live with RippleNet prospective digital wallet customers and banks
- 3 Find ways to make ODL more cost-efficient
 - o Maximize lower cost corridors (EUR/USD) and minimize higher cost corridors (AUD/PHP)
 - o Adjust how FX rebate is calculated
 - o Restructure MM contracts
